## **DETAILED ACTION**

### ***Drawings***

1. Figures 1-3 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.
2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "sealing portion formed on a third substrate is provided that constitutes a portion that crosses a line connecting the fixed contacts and the movable contact outside a gap between the fixed contacts and the movable contact, and seals at least the fixed contacts and the movable contact by bonding them to the stationary substrate or to the movable substrate" (Claim 1), must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 2832

4. Claims 1-19 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The claimed recitation (Claim 1), "wherein a sealing portion formed on a third substrate is provided that constitutes a portion that crosses a line connecting the fixed contacts and the movable contact outside a gap between the fixed contacts and the movable contact, and seals at least the fixed contacts and the movable contact by bonding them to the stationary substrate or to the movable substrate", is deemed nonenabling because the Examiner cannot identify its representation in either the detailed description or the drawings.
